HOYT NURSERIES

The

NEW CANAAN · CONN.

Telephone 1333

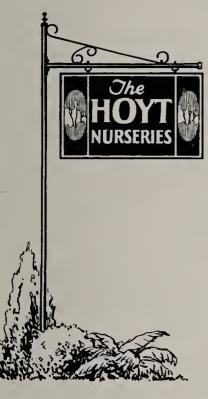

LOCATION

Our Nursery is located in the town of New Canaan, Conn., easily accessible by motor from all points in Westchester County, N.Y., and Fairfield County, Conn.

Foreword

PLANTING-TIME

The spring season starts as soon as the frost is out of the ground and extends throughout April, May, and June.

Our material is so grown that late planting can be done successfully. Since most of our plant material comes balled and burlapped, it is possible for us to move plants in late spring and even through early summer.

The fall season starts in August and extends through Decem-

ber or as long as the ground is open.

LANDSCAPE SERVICE

Our Landscape Department will be glad to be of assistance to you without charge in advising you about your plantings. However, if plans and specifications are furnished, a minimum charge will be made to cover these expenses. This charge will be deducted if our nursery furnishes the plant material.

LARGE-TREE MOVING

Our nursery is equipped for the moving of large trees. For the last thirty years we have moved thousands of these trees successfully and they have been a satisfaction to their owners. Fall or winter is the best time for moving large trees, since it is then possible to do this heavy work with less injury to lawns.

RESERVATIONS

Plants marked in the nursery for future delivery will be held over for only one season, or six months time, unless payment is made. Plants are held at the buyer's risk.

DELIVERIES

Are made free within a radius of 18 miles. On small orders, however, delivery will be made at our convenience when our truck is going in your direction. Plant material will be delivered to your grounds but will not be carried to planting locations unless arrangements have been made in advance. Packing will be charged for at cost on freight and express shipments.

PRICES

In this list are f.o.b. New Canaan, Conn., and are for our selection only. Plants selected by our customers will be charged for according to their individual value. These prices supersede all others and are subject to change without notice.

TERMS

Cash or satisfactory references must accompany all orders, unless the person ordering is known to us.

GUARANTEE

It is our policy to guarantee our nursery products for a full year, and to replace without charge any plant or tree which dies or is unsatisfactory to the owner within that time, provided payment is received within 30 days. The cost of planting and transportation of replaced trees is borne by the purchaser and replacement is done at our convenience.

Juniperus chinensis columnaris, the taller varieties in this planting

Evergreens

Evergreens in some variety are necessary in almost all landscape work. They offer a richness of color to the garden in summer as well as a good background for your flowers. During the winter they continue to lend charm to the landscape when all deciduous plants have lost their leaves.

Juniperus · Juniper; Cedar

The Juniper is another large group of evergreens which grows in almost all parts of this country as well as in many parts of the world. These plants are used extensively for garden work due to their varying types and interesting habits of growth. All varieties are extremely hardy, have attractive foliage, and some have showy berries in the fall.

Pinus · Pine

Most of these well-known evergreens grow rapidly into large, rugged trees. They are hardy, have attractive, colorful foliage, and are particularly well suited for windbreaks or screens, but also grow into beautiful specimen trees. They enjoy a light, well-drained soil.

Pseudotsuga · Douglas Fir

This evergreen is a rapid, graceful grower. Its foliage varies from light to dark green and in some types even to a bluish green. It is perfectly hardy, transplants easily, and becomes more beautiful as it grows older. It is a very worthy evergreen.

Taxus cuspidata nana

Taxus · Yew

The Yews belong to one of the most ancient families of trees on earth and have long been highly valued in England and Japan for their dark green beauty and permanence. Most varieties grow into handsome plants and trees. Some are adorned with red berries in the late summer and fall. The varieties listed are hardy and transplant easily.

Tsuga · Hemlock

Stately grace and dignity characterize the Hemlock which we consider the most beautiful of the larger North American evergreens. Its attractive dark green foliage weeps gracefully and is tipped with the bright green of new growth during the spring. Hemlocks are hardy and thrive in almost any soil. They tolerate the shade better than other evergreens and may be used for hedges, backgrounds for gardens, or as specimens.

Boxwood bordered Walks and Rhododendrons

Hardy Evergreen Shrubs

The importance of this class of plant material has long been recognized by many garden lovers. These plants present an attractive appearance, both summer and winter. Most of these grow well in almost any soil. Since they are slow growers and therefore easy to keep in bounds, they grow more beautiful with age.

Azaleas

Azaleas are usually classed in two groups, the evergreen and the deciduous. This material, like Rhododendron, wants a somewhat acid soil and should be planted with protection from winter winds. Happily situated, these plants produce brilliant blossoms of many colors. They need plenty of moisture during blossomtime. Some of our native types grow into fairly large bushes but most Azalea varieties seldom attain a height of more than 3 to 4 feet.

White-Flowering Dogwood

Flowering Trees

There is probably no group of deciduous plants as popular or well known as this one. Their interesting habits of growth, with glossy foliage combined with gorgeous blossoms in the spring and followed by attractive fruit of many colors in late summer and fall, make them an all-year-round satisfaction. Trees in this group thrive in almost all kinds of soil, and most varieties are very hardy. They should be allowed plenty of room for full development in years to come.

Prunus · Japanese Flowering Cherry

This worthy contribution to flowering trees from Japan thrives in this locality. The weeping variety blossoms early and is very attractive in its habit of growth. The blooms of the Upright Cherry come later and last longer. They are single or double, depending on variety, and their colors range from pure white through light and deep pink.

Purple or Copper Beech

Ornamental and Shade Trees

Possibly the most attractive features in many of our New England towns are the large shade and ornamental trees. The importance of these trees is becoming more evident every year, and when one of these beautiful old timers dies or is destroyed, it seems as if we have lost an old friend.

It takes years to develop a beautiful specimen. Therefore, plant a few trees of medium size each year. Don't wait or you may pay ten times as much for the same tree years later. Why not see it grow up on your property?

Deutzia lemoinei and Rhododendrons

Flowering Shrubs

Included among the Flowering Shrubs are those old favorites well known to all, as well as some worthy new varieties. Our Shrubs are particularly well grown and are considerably heavier than the regular nursery-grown shrubs usually offered. They will blossom the first year if planted early.

Larger specimen shrubs listed on pages 37 and 38.

Larger specimen sinus fished on pages 5. and 5c.

Specimen Transplanted Shrubs

These plants are several years older than our regular line of shrubs offered on pages 29-36 and are considerably larger and, of course, more costly. Since they have been properly trimmed and developed in the nursery, they will continue to grow into beautiful specimens and produce better blooms and foliage. They are particularly useful for background work and for screens.

Double Lilac

Syringa · Lilacs

Spring is at its height when the Lilacs are in flower. Of the many flowering shrubs, the Lilac is surely the most reliable, lasts longer, and annually bears the handsomest flowers. Lilacs are hardy, thrive almost anywhere, and have very attractive foliage.

The Hybrid varieties are most popular with their large single or double flower-heads. They are equally as fragrant as the old-fashioned type and have exactly the same growing characteristics. Our Hybrids are all grown on Lilac roots, a necessity for proper development of the plant. We believe these plants the most worthy of all flowering shrubs.

WICHURAIANA. Single. White. Late bloomer.

2-yr. Apple Tree

Fruit Department

We offer fruit trees in those varieties which thrive and produce

best in this locality.

During the past few years many of our fruit trees have been sold for ornamental purposes. The artistic habit of growth, combined with spring blossoms, make some varieties very beautiful ornamental trees.

We offer Apple Trees in bearing sizes up to 10 inches in diameter, 15 to 18 feet high, and 15 to 18-foot spread.

Apples, Standard

2-yr., 5 to 6 ft. high, $\frac{11}{16}$ -in. cal., \$1.50 each, \$12.50 for 10

SUMMER VARIETIES

Red Astrachan. Flesh, tinged with red. Yellow Transparent. Pale yellow.

AUTUMN VARIETIES
Fall Pippin. Tender; juicy
Gravenstein. High flavor. Juicy. McIntosh Red. Delicious; juicy.

WINTER VARIETIES

Baldwin. Large; dark red. Delicious. Red; juiey.

King. Large; red.

Northern Spy. Large; striped red. Rhode Island Greening. Large; greenish yellow Stayman's Winesap. Medium to large; dark red.

Apples, Standard, Large-sized	Ea	ch
$1\frac{1}{2}$ to $1\frac{3}{4}$ -in. cal., 5 to 6 ft. high	. \$3	00
$1\frac{3}{4}$ to 2-in. cal., 5 to 7 ft. high	. 5	00
2 to 2½-in. cal., 6 to 8 ft. high	. 10	00
$2\frac{1}{2}$ to 3-in. cal., 6 to 8 ft. high	.12	00

$3\frac{1}{2}$ to 4-in. cal., 6 to 8 ft. high\$25 to	35	00
Large specimen Apple Trees priced on application.		

VARIETIES AS FOLLOWS:

Baldwin. Large; red. Delicious. Red; juicy. Fall Pippin. Tender; juicy. Gravenstein. High flavor. King. Large; red.
McIntosh Red. Delicious; juicy.
Wealthy. Dark red.

Apples, Dwarf

2-yr., 3 to 4 ft. high, 5/8-in. cal., \$1.50 each

VARIETIES AS FOLLOWS:

Delicious. Red; juicy. Winter.
McIntosh. Delicious; juicy. Autumn.
Wealthy. Dark red. Early autumn.
Yellow Transparent. Pale yellow. Summer.

Crab-Apples

2-yr., 5 to 6 ft. high, $\frac{11}{16}$ -in. cal., \$1.50 each, \$12.50 for 10 Hyslop. Crimson fruit. October. Transcendent. Yellow and red. September.

Pears, Standard

2-yr., 5 to 6 ft. high, $\frac{11}{16}$ -in. cal., \$1.50 each, \$12.50 for 10 SUMMER VARIETIES
Bartlett. Yellow and red fruit.

Clapp's Favorite. Yellow and crimson.

AUTUMN VARIETIES

Beurre Bosc. Yellow-russeted. **Sheldon.** Yellow and red fruit.

WINTER VARIETIES

Beurre d'Anjou. Greenish yellow; juicy. Kieffer. Greenish yellow.

Pears, Dwarf

2-yr., 3 ft. high, $\frac{5}{8}$ -in. cal., \$1.50 each Bartlett. Yellow and red fruit. Summer. Clapp's Favorite. Yellow and crimson. Summer. Seckel. Small; brown; juicy. Autumn.

Peaches

4 to 5 ft., 75 cts. each, \$6.50 for 10 Belle of Georgia. Large; white. Early September.

Carman. White flesh. August.
Crawford's Early. Yellow. September.
Elberta. Large; yellow. Early September.
J. H. Hale. Yellow. September.

Plums

5 to 6 ft., \$1.50 each, \$12.50 for 10

Abundance. Japanese. Yellow. August. Bradshaw. Purple. September. Burbank. Large, red fruit. August. German Prune. Blue. September. Lombard. Purplish red. August.

Cherries, Sweet

5 to 6 ft., \$1.50 each, \$12.50 for 10

Black Tartarian. Large; purplish black. June. Governor Wood. Yellow. June. Napoleon Bigarreau. Fine yellow. July.

Cherries, Sour

4 to 5 ft., \$1.25 each, \$10 for 10

Early Richmond. Medium; red. June. Montmorency. Large; red June.

Grapes

3-yr., 60 cts. each, \$5 for 10

Brighton. Large; red. September. Concord. Best black. September. Delaware. Small; red. September. Green Mountain. Green. Late August. Niagara. Fine white. Late September. Worden. Large; blue. Late August.

Raspberries

2-yr. transplants, 15 cts. each, \$1.50 per doz.

Cuthbert. Rich crimson. Latham. Everbearing; red. Plum Farmer. Blackcap.

Blackberries

2-yr. transplants, 15 cts. each, \$1.50 per doz.

Blowers. Very large; ripens early.

Peat Moss (Horticultural Grade)

Excellent for mulching broad-leaf evergreens and general garden use. Size of bale, 22 to 23 bushels. Per bale, \$3.50; 5 bales, \$3 per bale; 10 bales, \$2.75 per bale.

Discount from above prices when sold with nursery stock.
Approximate areas covered by Peat Moss: 1 bale covers 250 sq. ft. 1 in. deep; 125 sq. ft. 2 in. deep; 80 sq. ft. 3 in. deep.

Bone Meal

Excellent quality **Bone Meal**, high nitrogen content. Per bag, \$3.50; 5 bags, \$3 per bag; 10 bags, \$2.75 per bag.

Top Soil, per yard, \$3.

Manure, per yard, \$5.
